- AWS

### About Me

---

During my 4 years of engineering I have worked on various projects such as building a responsive website to full stack webapplication using MERN stack. I have also knowlege of various other tech stack such as for making blockchain application NFT or cryptocurrencies. I have also good experience in various o.s Ubuntu linux , Windows .

### Professional Experience

---

RIDIGI WORKS | MERN STACK DEVELOPER  
2021 – 2022

Key responsibilities:

- Used figma for developing ui/ux design
- react.js was the framework which I have used for developing responsive web application
- Mongodb was the database and node.js was the backend language which I used
- There were also requirement for scaling the application and for that purpose I have used AWS cloud services
